

Preface

The 2024 2nd International Conference on Nano Sciences, Chemical and Biological Materials (NSCBM 2024) is an international symposium on nano sciences, nano materials, chemical engineering, and biological materials, which was resoundingly held at Houston, USA during July 27-28, 2024. This conference is an opportunity to academics, scientists, engineers, researchers, manufacturers, and users to discuss, to present and to assess the results of their research work on recent developments in these fields, and to promote intercommunion and international collaboration between participants in related fields.

NSCBM 2024 program had included several keynote plenary lectures by distinguished scientists in different areas covered by the main theme of the conference, to provide thematic presentations of their most recent findings.

The main objective of NSCBM 2024 was to attract educators, postgraduate students, teachers, researchers, and policy makers working in related fields. Delegates from schools, colleges, universities, and governments from all parts of the world participated in the conference. The conference enabled participants to share and exchange scientific information views and experiences on important issues.
